Prof. A. Gray;

Dear Sir - I have seen the agent of the steamship Co. which collected charges on my box at both ends of the route, & he has refunded to me the amt. you paid, viz. $3.85. So you may deduct that sum when you come to make a remittance to me. It seems they charged you $1.15 more than they did me - but they had the trouble of taking it around by New York for nothing.

I am much obliged to you for replying to the communication of Mr. Hurst. I have nothing to do with European plants now, & therefore would not exchange with the gentleman.

I will send with this a few plants which I wish you would determine. They are characteristic specimens

but not my best looking ones -
All but the Umbelliferous plant -
will be in my next fascicle, so
you may throw them away - The Jerm
grew on a shell mound near the
mouth of the river; the Vicia
in a rich moist woods; the other
two in river swamps -

Yours very truly

A. H. Curtiss -

Vicia floridana, n. sp.
Benda angustifolia
Hygrophila ?
Cheilanthes microphylla, Sw.
